*Applied for Credit Hours

INTRODUCTION

This program is designed to bridge the gap between theoretical knowledge and practical clinical skills through supervised patient-based learning. During this course, participants will have the opportunity to observe, assess, and participate in clinical procedures under the guidance of experienced faculty members.

Patient safety remains our highest priority. All demonstrations and procedures are being conducted following institutional protocols, ethical guidelines, and informed patient consent. We request all participants to maintain patient confidentiality and professional conduct throughout the course.

“

We encourage active participation, questions and case discussions. The faculty members are available throughout the course to provide guidance and share their expertise.

The objectives of this fellowship program are:

01

To enhance clinical examination skills and improve diagnostic decision-making in ENT practice.

02

To gain hands-on experience with contemporary techniques and instruments.

03

To develop confidence in managing common and complex ENT conditions.

04

To encourage discussion, interaction, and evidence-based practice.

I would like to thank the organizing committee, faculty, supporting staff, and most importantly our patients, whose cooperation makes this educational experience possible.

KONDAVEEDU
ENT HOSPITALS

**I hope this course
provides valuable practical
knowledge that you can apply
in your daily clinical practice.**

Dr. Kanjula Jagan Mohan Reddy
25 years of vast ENT experience
Conducted 3 consecutive workshops
on DCR, Rhinology in years 2017, 2018 and 2019
